Title:	Thai synthesis, a magazine promoting Thai fusion
Authors:	Philip, Reiter
Keywords:	Creative Content Concentration--Senior Project
Issue Date:	2019
Publisher:	Senior Project--Media and Communication Program--Creative Content Concentration--Mahidol University International College
Abstract:	This paper is an overall reflection of my thesis project. Thai synthesis is a printed magazine which focuses on Thai fusion products. The goal of Thai Synthesis is to raise awareness of the existence of these modernized takes of cultural Thai products towards our target audiences. This paper will focus on the various aspects of completing the printed magazine, in terms of research and methodology of the magazine as well as the development and creativity of the content I have written. I have analysed the process of creating my thesis up until the final exhibition and had managed to come to a conclusion that my thesis could have been much more successful if a better plan was created. However, I still hope that my project is able to highlight a modernized version of Thai culture, Thai fusion towards society accurately.
